

```
1  #include <stdio.h>
2  #include <stdlib.h>
3  #include <string.h>
4
5  int main()
6  {
7      char str1[100];
8      char str2[100];
9      printf("Enter the first string\n");
10     gets(str1);
11     printf("Enter the second string\n");
12     gets(str2);
13
14     if(strcmp(str1,str2)== 0)
15         printf("The two strings are equals");
16     else
17         printf("The two strings are not equals");
18
19     return 0;
20 }
```
